Enjoy the outdoors... whatever the weather!

BBQ Huts

The perfect venue for a dinner party with a difference, the BBQ Huts are not a twice-a-year novelty, but a true all-year-round investment.

Imagine turning your steaks on the grill as the wind howls outside and you relax in the heat and aroma of your luxury BBQ Hut. You feel miles away as the craic builds and your friends begin to unwind from the stresses of the day. In fact, in one of our BBQ Huts, manufactured from the highest quality Northern Pine with double-glazed windows, you are entering a magical world of your own.

An attractive feature in any garden, this will become the centrepiece of your outdoor living space and a favourite dining venue for all the family. Oh, and don't forget, the pull out beds if you can't make it back home!

SUPERIOR PINE

Our BBQ Huts are produced from renewable best quality Northern Pines, which are selected by the most modern log x-ray and automatic grading technology.

Pinewood is accurately sawn, dried and graded according to wood features. The thickness of the wall is 45mm.

Pinewood is

- light with regular texture, ensuring good thermal insulation and a pleasant indoor climate
- flexible to use
- suitable for painting, therefore smooth coverage of the wood preserver and colour is guaranteed
- dense with its own natural resins which protect it against rot and therefore more durable than spruce.

The BBQ Hut floor is made from the highest quality pinewood panels of 18mm thickness and is firm and even, providing a stable base.

Each BBQ Hut has inside benches made from the excellent pinewood, which are perfect for relaxing in the cosy atmosphere. Bench cushions come as standard and provide extra comfort. Some of the benches can be extended for sleeping.

QUALITY

The unmistakable quality of our pine BBQ Hut helps create a product which is one of the best available on the market

Doors, Windows and Roof

Door

Our BBQ Hut door is made from multi-layer pinewood with a hexagon double-glazed window. The door set consists of a door frame, door leaf, hexagon window, adjustable hinges, lock and wooden handle. The door frames are made from 65 mm pine.

Windows

Our BBQ Hut has double-glazed windows, which ensure light transmission into the cabin and minimal heat loss to the outside. Windows are hermetic and durable. As decoration, wooden dividers are attached to the windows on the outside. These dividers can be easily removed for painting or can be left off altogether for a different look.

Roof

Bitumen roof shingles ensure the highest quality roofing:

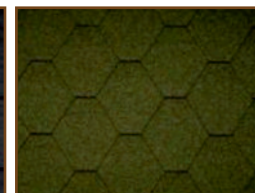

- Durable commercial grade
- Flame retardant
- Minimizes heat loss
- Resistant to wind, frost and moisture
- Maintains long-lasting colour
- Resistant to mould, moss and fungal growth.
- Hermetic
- Protects against the sun's UV rays
- Impervious to rain, snow and hailstones
- Resistant to temperature fluctuations
- Insulates from rain and hailstone noise
